## US Food Service Recovery Analysis

- Peak sales drop in 2020 ranged from -35% to -45% compared to 2019, indicating severe industry-wide impact
- Best-case scenario shows potential recovery to pre-crisis levels by early 2021, contingent on virus containment
- Recovery timeline varies significantly: 6-8 months in optimistic scenario vs 3-4 years in virus recurrence scenario
- Q3-Q4 2020 projected sales remain -10% to -40% below 2019 levels, suggesting persistent challenges
- Quick-service and fast-casual restaurants show better resilience compared to fine-dining establishments

# DIAGRAMS, INFOGRAPHICS, MOCKUPS WITH GEN AI

Claude

Sterlite Power, a leading power transmission company, seeks a comprehensive dashboard mockup to visualize project progress across its three critical stages: Foundation, Erection, and Stringing. The dashboard should dynamically display data for different tower types, offering a clear view of Key Performance Indicators (KPIs) such as completion percentage, average completion time, resource allocation, and delay metrics. Designed in a 16:9 format, the dashboard must enable stakeholders to monitor real-time progress, identify bottlenecks, and facilitate data-driven decision-making for efficient project execution.

I'll help create a comprehensive project dashboard for Sterlite Power's transmission tower construction phases. I'll use React with Recharts for visualization and create a clean, professional layout that emphasizes the key metrics across all three stages.

Sterlite Power Project Progress Dashboard  
Click to open component  
Published

I've created a comprehensive project dashboard for Sterlite Power with the following key features:

1. Phase Selection
  - Toggle between Foundation, Erection, and Stringing phases
  - Each phase shows relevant KPIs and metrics
2. Key Performance Indicators
  - Completion Rate
  - Average Completion Time
  - Number of Delayed Projects
  - Resource Utilization
  - Trend indicators showing month-over-month changes
3. Visualizations
  - Progress by Tower Type (Bar Chart)
  - Timeline Progress (Line Chart)
  - Resource Allocation (Pie Chart)

The dashboard mockup shows various components: a header with a back arrow and title; a navigation bar with tabs for Foundation, Erection, and Stringing; four KPI cards with completion rates (75%, 15 days, 8, 85%) and growth percentages; a red alert box for delayed projects; a bar chart for 'Progress by Tower Type' comparing 'Completed' (blue) and 'Total' (green) for towers A, B, and C; a line chart for 'Timeline Progress' from January to March comparing 'Planned' (green) and 'Actual' (blue); a pie chart for 'Resource Allocation'; and a section for 'Efficiency Metrics' with a 'Resource Utilization' card. The bottom left shows a reply message from Claude. The bottom right features a photo of a smiling man with a name tag that reads 'HAVISH M CONSULTING'.

High-Risk Loan Processing Workflow for IndusInd Bank

**HM** Design a comprehensive High-Risk Loan Processing Diagram for IndusInd Bank that visually maps the critical steps involved in approving and managing high-risk loans. The diagram should include key stages such as risk assessment, document verification, credit scoring, approval decision, disbursement, and ongoing monitoring. It should also emphasize critical steps like regulatory compliance checks and risk mitigation measures, accompanied by explanatory notes for clarity. Incorporate a Gantt chart to visually outline the timeline for each stage, ensuring clear dependencies and time allocations. The goal is to create a streamlined, visually engaging diagram that aids in operational efficiency and ensures transparency in high-risk loan management.

I'll create a comprehensive diagram for IndusInd Bank's high-risk loan processing workflow using Mermaid, incorporating both the process flow and a Gantt chart.

</>

**High-Risk Loan Processing Workflow**

Click to open diagram

Key features of this workflow:

1. Initial Assessment: Risk-based application screening and thorough document verification
2. Risk Evaluation: Multi-layered credit and regulatory compliance checks
3. Decision Making: Structured committee review with clear approval paths
4. Disbursal: Final verification checkpoints before fund release
5. Monitoring: Continuous risk assessment with early warning system

The Gantt chart shows a typical 56-day timeline from application to monitoring setup, with ongoing monitoring thereafter. Critical dependencies are maintained between stages to ensure thorough risk management.

Would you like me to modify any specific aspect of the workflow or timeline?

# Landmark Employee Onboarding for Finance

Design a comprehensive financial process diagram for a Dubai-based finance role that visually maps the step-by-step workflow for executing and managing key financial activities.

The diagram should highlight critical path activities, such as regulatory compliance checks, fund allocation, report submission, and audit reviews, ensuring they are clearly marked for priority attention.

The diagram should also include checkpoints for compliance with Dubai's financial regulations, including deadlines for submissions and approvals.

Non-compliance consequences, such as financial penalties, operational delays, or reputational damage, must be visually represented alongside the respective steps.

The goal is to create a user-friendly, streamlined flow that ensures a clear understanding of the critical path activities, minimizes the risk of oversight, and emphasizes the importance of adhering to timelines and compliance standards.

The organizational chart illustrates the structure of Metropolis Healthcare's African expansion. At the top level, there is a single purple rectangular box representing the CEO. This box has three curved arrows pointing down to three blue rectangular boxes, which represent the three main regional offices: East Africa, Southern Africa, and West Africa. Each of these regional boxes contains four smaller white rectangular boxes, representing local branches or clinics. The labels for these local units are partially visible and include "Healthcare Center", "Hospital", "Clinic", and "Community Health". The entire chart is set against a dark background.

HAVISH M CONSULTING

# Sterlite Power Project Progress Dashboard

# Bharat Petroleum

# Dashboard Mockup

Design a QR Code Lifecycle Dashboard for Bharat Petroleum that visually represents the end-to-end flow of QR codes used for customer transactions, from creation to expiration. The dashboard should leverage the following columns:

## QR Code Lifecycle:

Start with qrcode\_created\_timestamp and qrcode\_status\_created\_timestamp to show when a QR code is generated and first activated.

Highlight updates using qrcode\_modified\_timestamp and qrcode\_status\_modified\_timestamp.

## Transaction Tracking:

Include product\_code, qrcode\_amount, qrcode\_scheme, and qrcode\_yearofissue to display product-specific details and transaction summaries.

Use qrcode\_transaction\_history to

capture the timeline of all interactions.

## Customer Interaction:

Map customer engagement using customer, mobile\_no, and scan\_timestamp to show who scanned the QR code and when.

Add geolocation data (scan\_latitude, scan\_longitude) for insights into scanning patterns by region.

## Coupon Management:

Show status transitions with rsncode\_oldcoupon, runcode\_newcoupon, and coupon\_type.

## Operational Metrics:

Track data health with key\_hash and data\_hash.

Use dw\_insert\_ts, FileDate, filename, and Source for operational monitoring.

## Departmental View:

Separate insights by BU to customize reports for business units.

Highlight the QR code's notification status (qrcode\_isctel\_notified) and related SAP details (sap\_cc\_number).

## Goal:

The dashboard should provide a real-time, user-friendly visualization that:

Monitors the lifecycle of QR codes for efficiency.

Tracks customer interaction trends to optimize marketing efforts.

Ensures compliance and data integrity across Bharat Petroleum's divisions.

Create the mockup in a way that empowers stakeholders to make data-driven decisions, focusing on customer behavior, operational efficiency, and strategic improvements.

# Bharat Petroleum Dashboard Mockup

Claude

**HM** Design a QR Code Lifecycle Dashboard for Bharat Petroleum that visually represents the end-to-end flow of QR codes used for customer transactions, from creation to expiration. The dashboard should leverage the following columns:

**QR Code Lifecycle:**  
Start with qrcode\_created\_timestamp and qrcode\_status\_created\_timestamp to show when a QR code is generated and first activated.  
Highlight updates using qrcode\_modified\_timestamp and qrcode\_status\_modified\_timestamp.

**Transaction Tracking:**  
Include product\_code, qrcode\_amount, qrcode\_scheme, and qrcode\_yearofissue to display product-specific details and transaction summaries.  
Use qrcode\_transaction\_history to capture the timeline of all interactions.

**Customer Interaction:**  
Map customer engagement using customer, mobile\_no, and scan\_timestamp to show who scanned the QR code and when.  
Add geolocation data (scan\_latitude, scan\_longitude) for insights into scanning patterns by region.

**Coupon Management:**  
Show status transitions with rsncode\_oldcoupon, runcode\_newcoupon, and coupon\_type.

**Operational Metrics:**  
Track data health with key\_hash and data\_hash.  
Use dw\_insert\_ts, FileDate, filename, and Source for operational monitoring.

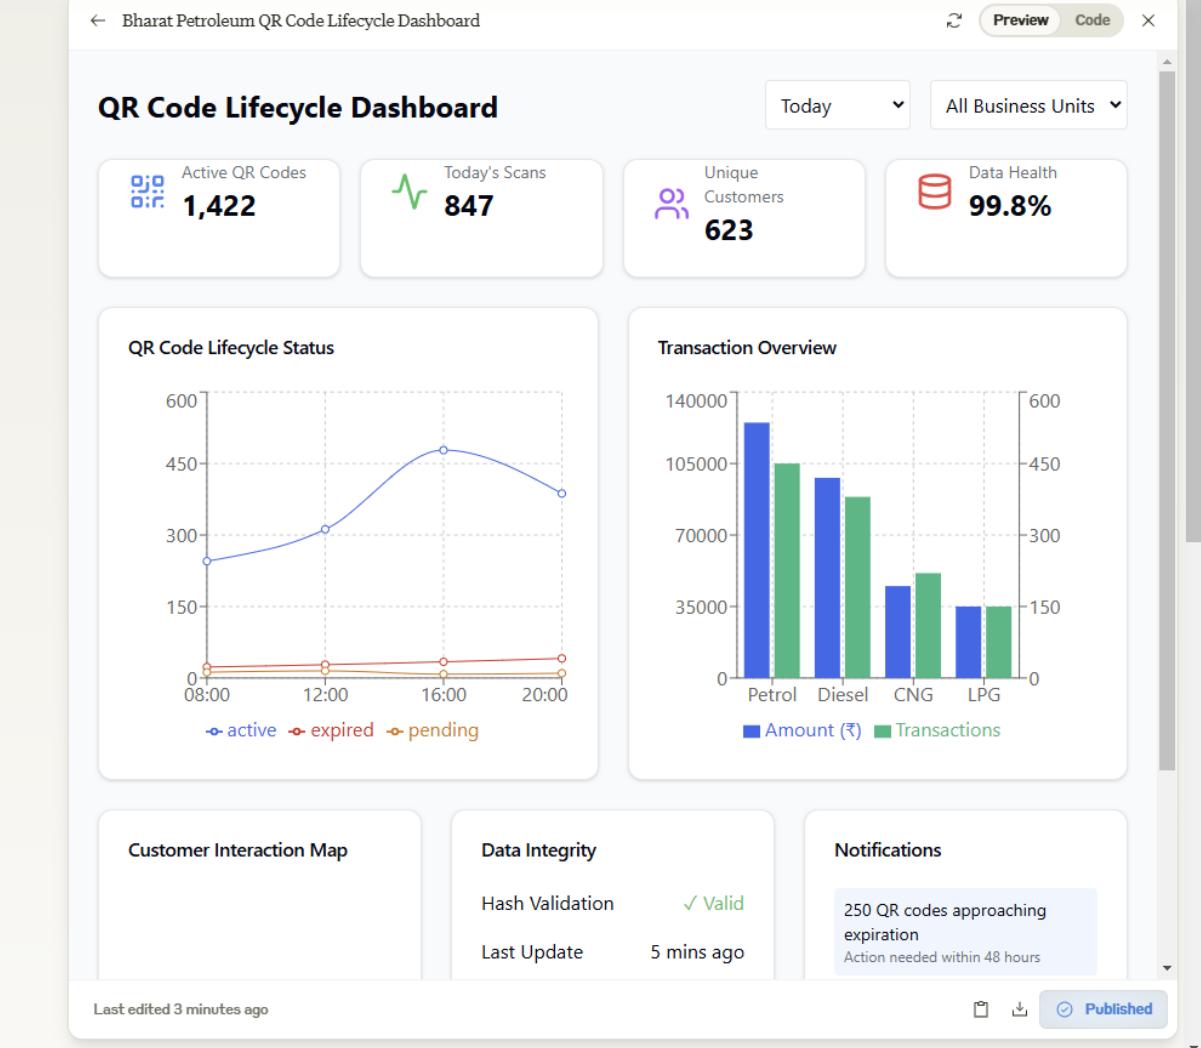

**Departmental View:**  
Separate insights by BU to customize reports for business units.  
Highlight the QR code's notification status (qrcode\_isctel\_notified) and related SAP details (sap\_cc\_number).

**Goal:**  
The dashboard should provide a real-time, user-friendly visualization that:  
Monitors the lifecycle of QR codes for efficiency.  
Tracks customer interaction trends to optimize marketing efforts.

# Talent Tracker for NSDC

Design a comprehensive Talent Tracker for the National Skill Development Corporation (NSDC), incorporating a 9-Box Performance-Potential Grid to evaluate employees. The tracker should include the following details:

1. Performance Metrics: Include three levels of performance scoring (Low, Medium, High), derived from key performance indicators aligned with NSDC goals.
2. Potential Metrics: Categorize potential into three levels (Low, Medium, High) based on competencies, leadership readiness, and ability to take on expanded roles.
3. Color-Coded Visualization: Use distinct colors for each box in the grid for easy identification of talent categories, e.g., red for low performers, yellow for medium, and green for high performers.
4. Role-Specific Insights: Enable filtering by roles (e.g., trainers, administrators) to tailor the tracker to NSDC's diverse job functions.
5. Employee Profiles: Integrate detailed employee profiles, including training history, certifications, and key achievements.
6. Gap Analysis: Provide insights into skill gaps and development needs for employees in each grid category.
7. Action Plans: Recommend targeted interventions such as upskilling, mentoring, or role reassignment based on grid placement.
8. Time-Based Trends: Track changes in performance and potential over time, with historical data comparisons.
9. Customizable Metrics: Allow customization of metrics to reflect NSDC's focus areas, such as vocational training impact and community outreach.
10. Exportable Reports: Include an option to generate visual and tabular reports for management review and decision-making.

# Recreate Ather Energy Savings Calculator

Design an interactive energy savings calculator diagram for Ather that visually showcases the cost-saving benefits of using Ather electric scooters compared to traditional petrol-powered vehicles.

The calculator should include the following interactive features:

**Dropdown Menu:** Allow users to select from three different states, dynamically updating the petrol rates specific to the chosen region.

**Slider Inputs:** Enable users to set their daily travel distance, ranging from 10 km to 100 km, and see real-time updates on fuel cost savings.

**Ather Models:** Incorporate all Ather scooter models, allowing users to toggle between them to compare performance and savings.

**Dynamic Savings:** Clearly display the calculated savings in fuel costs, adjusted dynamically based on user inputs such as distance, state-wise petrol rates, and the selected Ather model.

The goal is to create an intuitive, visually engaging flow that educates potential customers on the economic and environmental benefits of switching to Ather scooters while reinforcing the brand's innovative and customer-focused approach.

# Recreate Ather Energy Savings Calculator

The screenshot shows the Ather Energy Savings Calculator interface. At the top, there's a navigation bar with links for Investor Relations, Charging, Smart Helmets & Accessories, and Locate Us. The main heading is "Track your electric savings" with a dropdown menu set to "Bengaluru". On the left, a sidebar titled "Select an Ather" shows the "Ather 450S" selected. Below it, there's a checkbox for "Pro" mode and a field for "How far do you ride daily?" with "15 km" entered. On the right, a large box displays "Your total savings in 5 years" as ₹ 60 047, broken down into Fuel cost savings (₹ 51 107) and Service cost savings (₹ 22 500). Below this, there are tabs for "Savings", "Cost per km", "Comparison", and "Advantage". A vertical scroll bar is visible on the right side of the page.

# Chaayos Mobile App Mockup

Design a mobile app mockup for Chaayos that showcases a seamless and engaging customer journey.

The app should include the following features:

**Gamified Onboarding:** Create a visually appealing and interactive onboarding experience, including playful animations and personalized greetings to make users feel welcome.

**AI-Powered Recommendations:** Incorporate a product recommendation section that highlights sustainable tea blends and snacks tailored to the user's preferences.

**Exclusive Partnerships:** Display a dedicated section featuring exclusive offers from Chaayos' partners, with clean and visually striking design elements.

**Order Placement:** Include an intuitive and aesthetic order interface that allows users to customize their tea and snacks effortlessly.

**Easy Payment Modes:** Showcase diverse, easy-to-use payment options such as UPI, wallets, and cards, with a secure and clutter-free design.

**Loyalty Program Integration:** Add a gamified loyalty program tracker, with progress bars and badges to encourage repeat purchases.

The mockup should emphasize Chaayos' brand identity, with warm, earthy tones and elements inspired by Indian culture and tea. Ensure the app layout is clean, intuitive, and optimized for mobile users, creating an engaging and visually appealing experience.

# NABARD Farmer App

# PowerPoint for Jubilant

Design a visually engaging 16:9 PowerPoint slide that maps the gamified strategies for inter-store competition during winter sales. The diagram should:

1. Illustrate key elements of the competition, including:

- \* Sales targets.
- \* Leaderboards.
- \* Reward tiers (e.g., gold, silver, bronze).
- \* Customer engagement points such as in-store events, discounts, and bonus rewards.

2. Incorporate gamification touchpoints, such as real-time updates, store rankings, and challenges for store teams.

3. Use icons and visual cues to highlight milestones, progress tracking, and achievements.

4. Ensure the layout emphasizes clarity, excitement, and winter-themed visuals (e.g., snowflakes, warm colors).

5. Create a user-friendly visual flow to inspire healthy competition, enhance customer experience, and maximize sales performance.

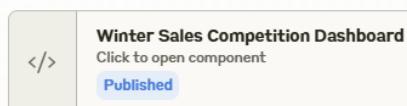

The goal is to provide a visually intuitive and motivating structure that encourages participation and boosts store-level performance during the critical winter sales period.

# PowerPoint for Jubilant

• Claude

Gamified Winter Sales Competition Strategy

- HM** Design a visually engaging 16:9 PowerPoint slide that maps the **gamified strategies for inter-store competition during winter sales**. The diagram should:
1. Illustrate key elements of the competition, including:
    - \* Sales targets.
    - \* Leaderboards.
    - \* Reward tiers (e.g., gold, silver, bronze).
    - \* Customer engagement points such as in-store events, discounts, and bonus rewards.
  2. Incorporate **gamification touchpoints**, such as real-time updates, store rankings, and challenges for store teams.
  3. Use icons and visual cues to highlight milestones, progress tracking, and achievements.
  4. Ensure the layout emphasizes clarity, excitement, and winter-themed visuals (e.g., snowflakes, warm colors).
  5. Create a **user-friendly visual flow** to inspire healthy competition, enhance customer experience, and maximize sales performance.
- The goal is to provide a **visually intuitive and motivating structure** that encourages participation and boosts store-level performance during the critical winter sales period.

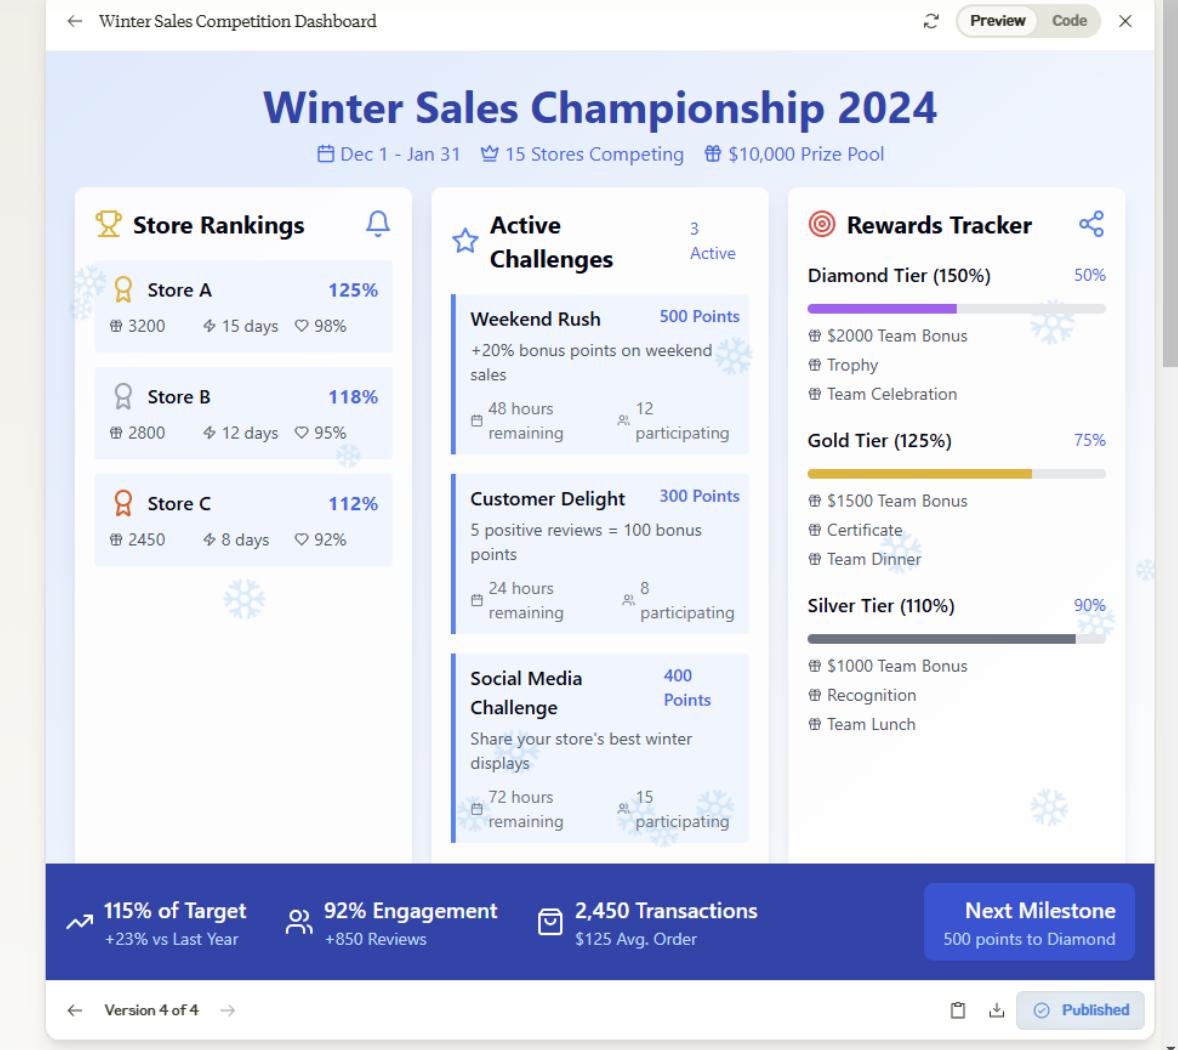

I've created a 16:9 slide design with:

1. Three-column layout showing rankings, challenges, and rewards
2. Animated snowflake background for winter theming
3. Real-time metrics in the bottom status bar
4. Visual hierarchy using cards, icons, and progress bars
5. Color-coded achievements and reward tiers

The design uses Tailwind CSS for responsive layout and styling. Let me know if you'd like any adjustments to the colors, layout, or content.

## Winter Sales Championship 2024

Dec 1 - Jan 31 | 15 Stores Competing | \$10,000 Prize Pool

### Store Rankings

Rank	Store	Transactions	Avg Order	Completion %
1	Store A	3200	\$125	98%
2	Store B	2800	\$118	95%
3	Store C	2450	\$112	92%

**Active Challenges**

- Weekend Rush** (+20% bonus points on weekend sales) | 500 Points | 3 Active | 48 hours remaining | 12 participating
- Customer Delight** (5 positive reviews = 100 bonus points) | 300 Points | 24 hours remaining | 8 participating
- Social Media Challenge** (Share your store's best winter displays) | 400 Points | 72 hours remaining | 15 participating

**Rewards Tracker**

- Diamond Tier (150%)** | 50% | \$2000 Team Bonus, Trophy, Team Celebration
- Gold Tier (125%)** | 75% | \$1500 Team Bonus, Certificate, Team Dinner
- Silver Tier (110%)** | 90% | \$1000 Team Bonus, Recognition, Team Lunch

**Performance Metrics**

- 115% of Target (vs Last Year)
- 92% Engagement (+850 Reviews)
- 2,450 Transactions (\$125 Avg. Order)

**Next Milestone** (500 points to Diamond)

## Winter Sales Challenge

### Rewards & Events

- 👤 In-Store Event Bonus
- ⭐ Customer Satisfaction Points
- 🎁 Team Achievement Rewards

# DS Group LMS

Design a comprehensive learning pathway diagram for DS Group's LMS for HR that visually maps the step-by-step process for employees to engage with technical and non-technical courses.

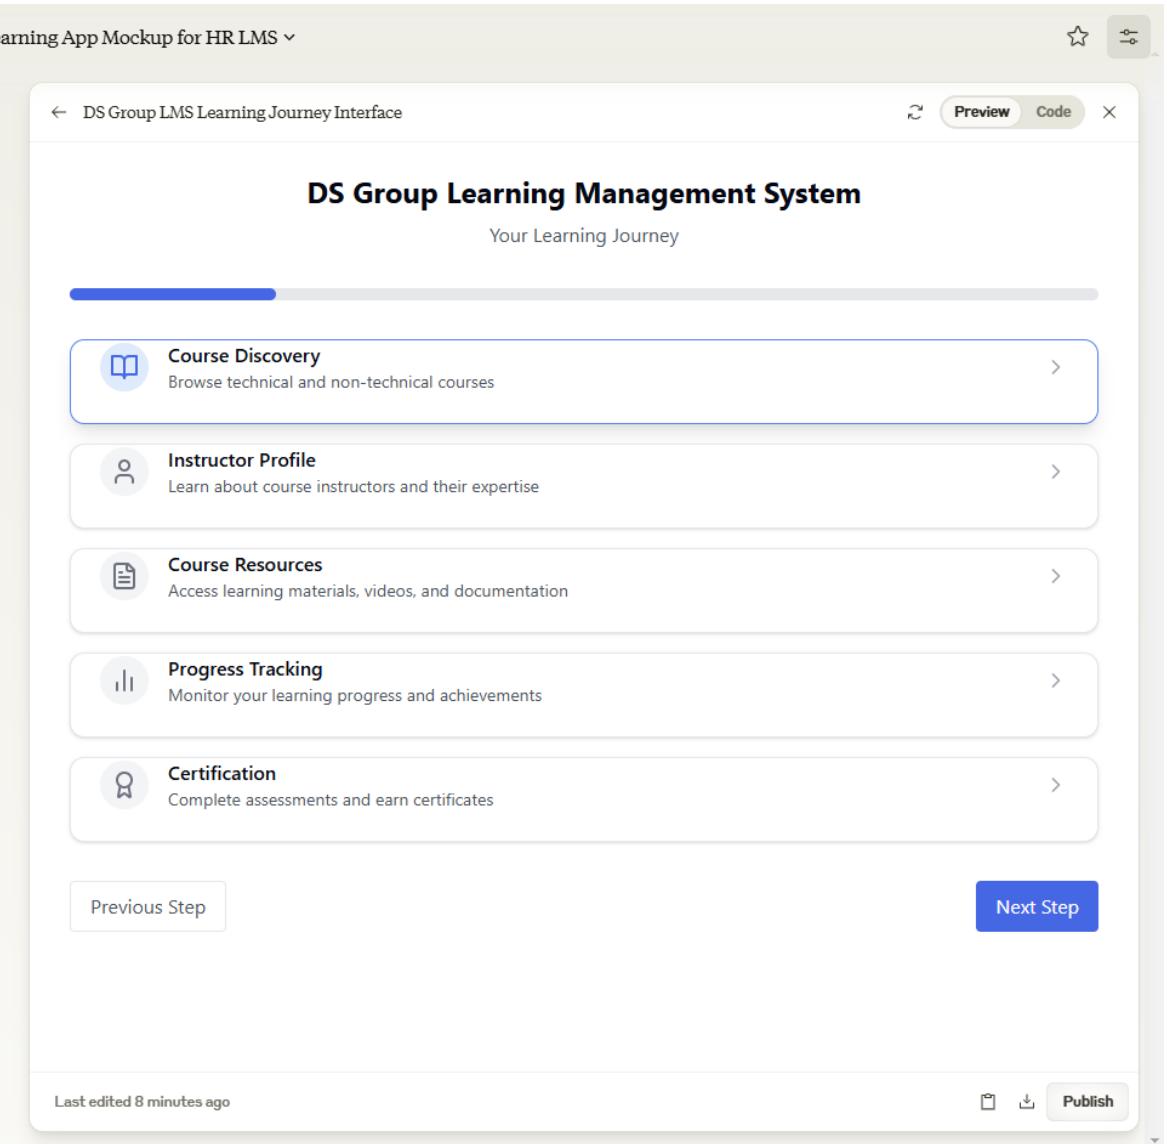

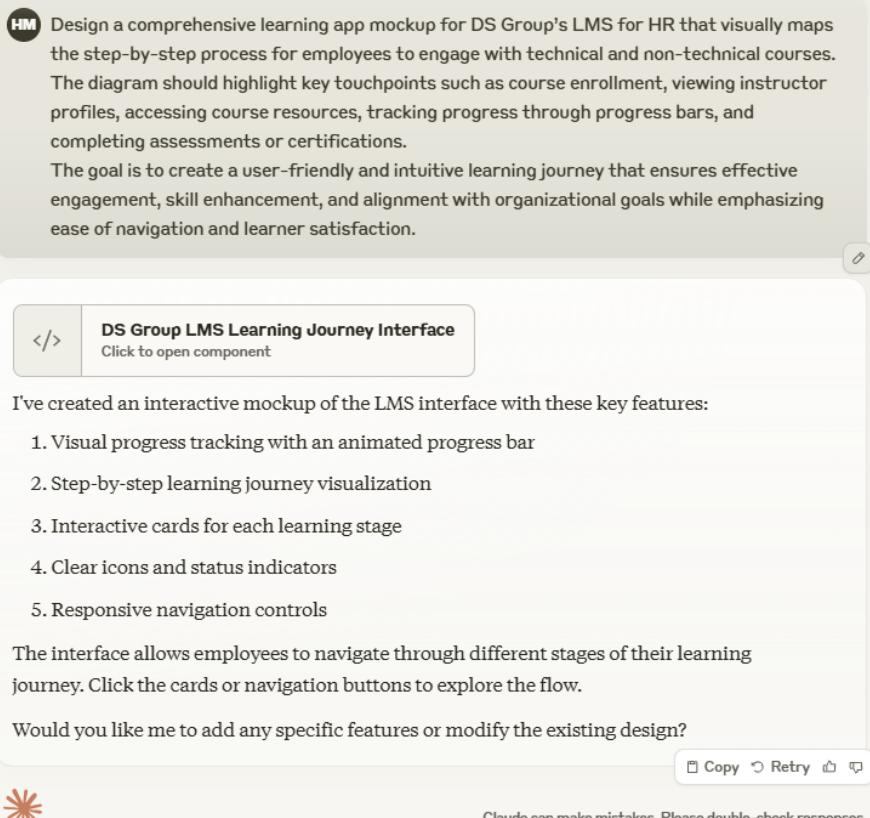

The diagram should highlight key touchpoints such as course enrollment, viewing instructor profiles, accessing course resources, tracking progress through progress bars, and completing assessments or certifications.

The goal is to create a user-friendly and intuitive learning journey that ensures effective engagement, skill enhancement, and alignment with organizational goals while emphasizing ease of navigation and learner satisfaction.

- The screenshot displays the DS Group Learning Management System interface. At the top center, the title "DS Group Learning Management System" is shown in bold black font, with the subtitle "Your Learning Journey" directly below it. A horizontal progress bar is positioned just beneath the subtitle. Below the progress bar, five rounded rectangular cards are listed vertically, each representing a different feature:
  - Course Discovery**: Shows a book icon and the text "Browse technical and non-technical courses".
  - Instructor Profile**: Shows a person icon and the text "Learn about course instructors and their expertise".
  - Course Resources**: Shows a document icon and the text "Access learning materials, videos, and documentation".
  - Progress Tracking**: Shows a bar chart icon and the text "Monitor your learning progress and achievements".
  - Certification**: Shows a certificate icon and the text "Complete assessments and earn certificates".At the bottom of the interface, there are two buttons: "Previous Step" on the left and "Next Step" on the right, with the "Next Step" button being blue.

# Events in Renewable Sector for Renew Power

Create a line chart.

Show important events in the renewable sector in India in last 5 years.

# Events in Renewable Sector

•

Claude

Rajnigandha Market Share Data Visualization

**HM** create a line chart

show important events in the renewable sector in india in last 5 years

I'll help create a visualization of key renewable energy events in India. Since I can create an interactive timeline visualization using React, I'll make a line chart with event markers.

</>

**India Renewable Energy Timeline**  
Click to open component

I've created an interactive timeline visualization that shows major renewable energy milestones in India from 2019 to 2023. The visualization includes:

1. A line chart showing the growth in renewable energy capacity (in GW)
2. Interactive markers for significant events
3. Tooltips that show detailed information when you hover over the event markers
4. Clear labeling and responsive design

You can hover over any of the event markers (shown as alert circles) to see the details of what happened in that year. The chart shows the impressive growth in India's renewable energy capacity, from 84 GW in 2019 to 170 GW in 2023.

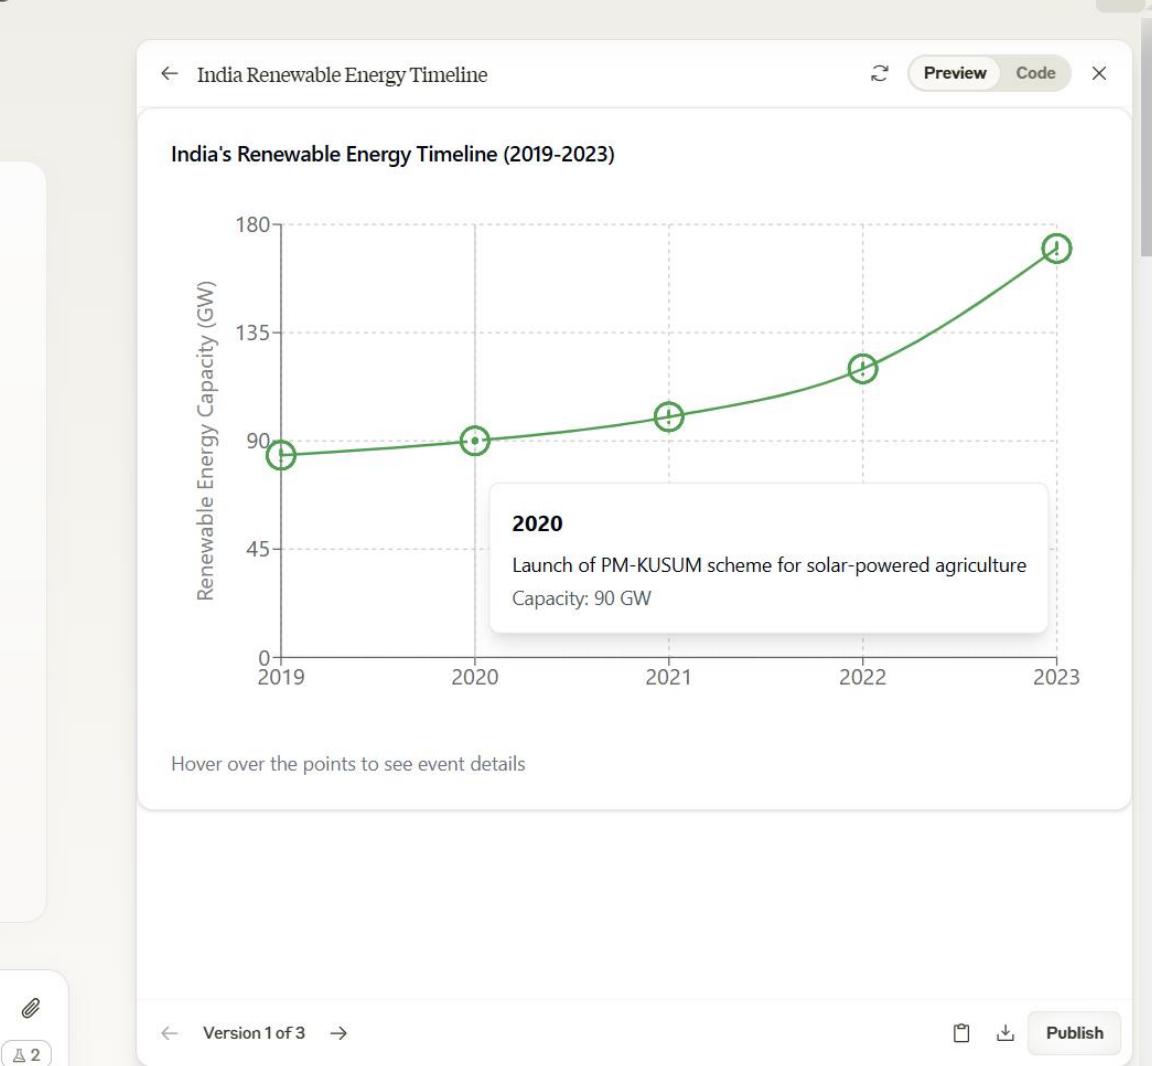

Would you like me to modify the visualization in any way or add more specific events to the timeline?

Reply to Claude...

Claude 3.5 Sonnet ▾ Choose style ▾

# Events in Renewable Sector

•

Claude

Rajnigandha Market Share Data Visualization

**HM** do not hover  
add number for annotations  
add foot notes

I'll modify the visualization to show annotations directly and add footnotes.

</> **India Renewable Energy Timeline**  
Click to open component

I've updated the visualization with these changes:

1. Added numbered annotations (1-5) directly on the chart points
2. Removed hover interactions
3. Added a clear event list below the chart with numbered bullets
4. Added detailed footnotes at the bottom explaining each event
5. Improved the visual hierarchy with clear sections for the chart, event list, and footnotes

The numbers on the chart correspond to the event list and footnotes, making it easier to reference specific events. Each event now has:

- A number marker on the chart
- A brief description in the event list
- A detailed explanation in the footnotes

Would you like any adjustments to the layout or content?

Claude

Click to open diagram

Now let me show you a vertical timeline design using React:

</> Untitled  
Click to open component

Here are a few more visualization options we could create:

1. **Milestone Map:** A circular visualization with events arranged in a clock-like pattern, with connections showing relationships between events.
2. **Timeline with Area Chart:** Combining the event markers with an area chart showing cumulative capacity growth.
3. **Calendar Heatmap:** Showing the intensity of developments across different quarters with a calendar-style visualization.
4. **Bubble Timeline:** Where the size of bubbles represents the impact or scale of each development.

Each of these options has different strengths:

1. The **Gantt chart** (first example) is good for:
  - Showing duration of initiatives
  - Visualizing overlapping programs
  - Displaying project phases
2. The **Vertical Timeline** (second example) excels at:
  - Readable event descriptions
  - Clear chronological progression
  - Visual categorization of events

•

Claude

Rajnigandha Market Share Data Visualization

**HM** calendar heatmap

I'll create a calendar heatmap visualization that shows the intensity of renewable energy developments across quarters and years.

</>

Untitled

Click to open component

I've created a calendar heatmap visualization with these features:

#### 1. Timeline Structure:

- Years (2019-2023) on the vertical axis
- Quarters (Q1-Q4) on the horizontal axis
- Color-coded cells showing activity intensity

#### 2. Color Coding:

- Light green: Single event quarters
- Medium green: Two events
- Dark green: Multiple events or major milestones
- Darker shades indicate higher impact or significance

#### 3. Interactive Features:

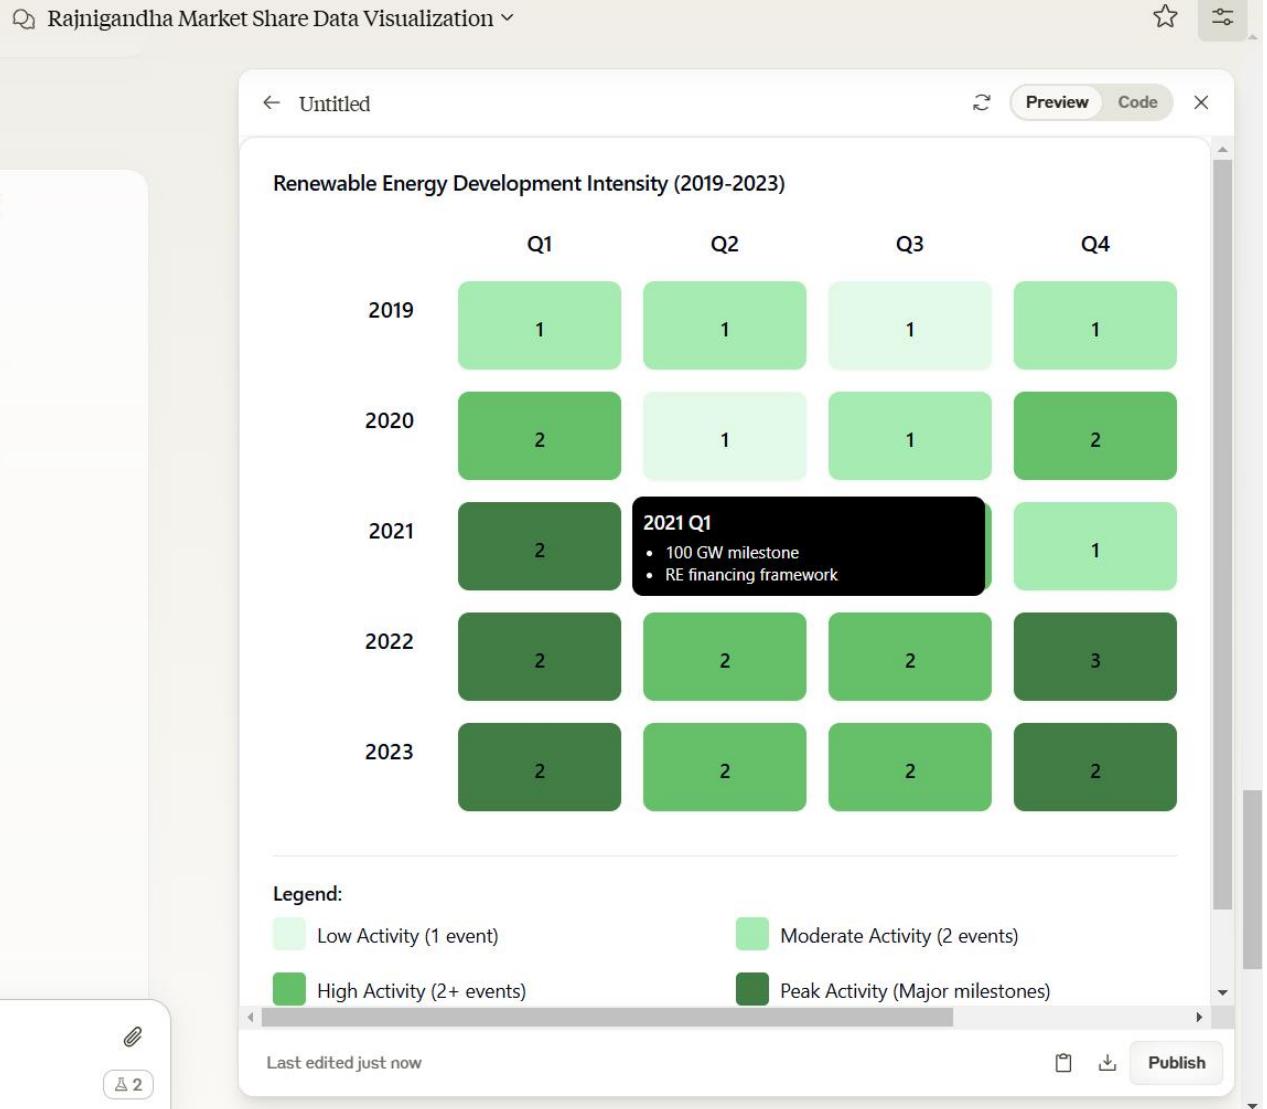

- Hover over any cell to see detailed events
- Event count displayed in each cell
- ~~Tooltip with full event descriptions~~

•

Claude

Rajnigandha Market Share Data Visualization

**HM** awesome  
can the hover show another column chart

I'll modify the calendar heatmap to show a small column chart in the hover tooltip that represents the capacity additions or key metrics for that quarter.

</> Untitled  
Click to open component

I've enhanced the calendar heatmap with these new features:

#### 1. Interactive Tooltip with Chart:

- Shows a column chart when hovering over each cell
- Displays the breakdown of renewable energy capacity by type:
  - Solar
  - Wind
  - Hydro
  - Other renewables

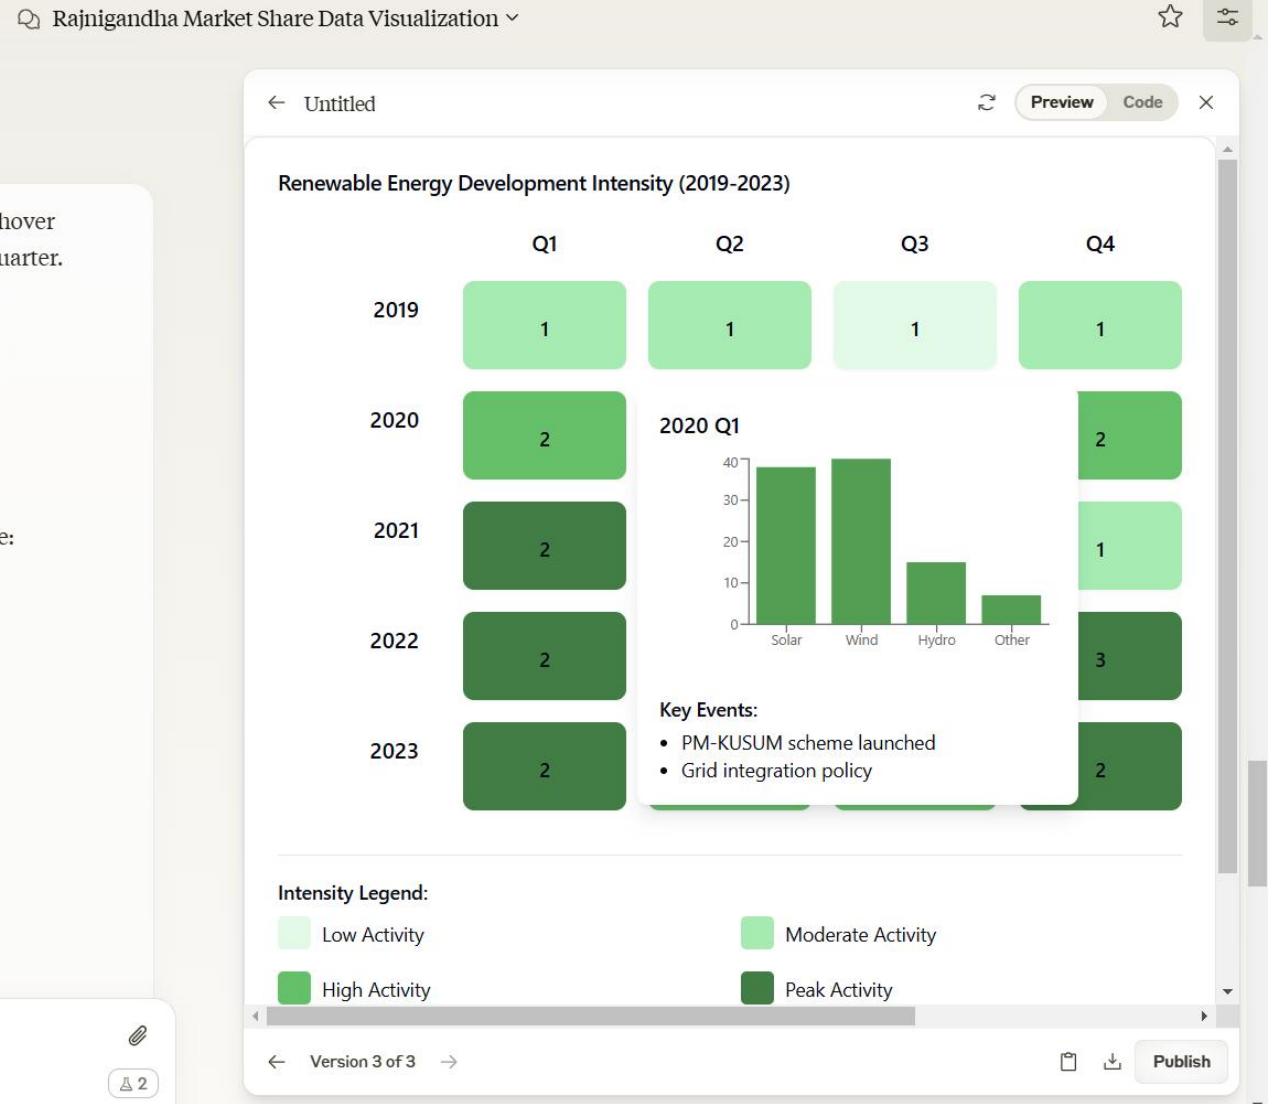

#### 2. Enhanced Tooltip Content:

- Title showing year and quarter
- Column chart with capacity distribution
- List of key events below the chart
- Clean, card-like design with shadow

# Chatbot for NSE Academy

Design a mockup for an intelligent and interactive chatbot platform tailored for NSE Academy. The platform should focus on training content related to Financial Planning and Analysis (FP&A). Key features to include are:

1. FAQ Section: A comprehensive repository of frequently asked questions, categorized for easy navigation. The chatbot should seamlessly retrieve and present answers from this FAQ database.
2. MCQ Module: A section with interactive multiple-choice questions to help users assess their understanding of FP&A topics. Include dynamic scoring and feedback.
3. Smart Chatbot: The chatbot should be capable of answering a wide range of questions related to FP&A, leveraging an advanced knowledge base. It should adapt to user queries, providing detailed explanations, contextual examples, and relevant references.
4. IVR Option: An integrated Interactive Voice Response (IVR) system, enabling users to access certain content or features via voice commands, enhancing accessibility.

Ensure the design is user-friendly, visually appealing, and optimized for both desktop and mobile devices. The overall theme should align with NSE Academy's branding, emphasizing professionalism and modernity.

FP&A Basics

**What is Financial Planning and Analysis (FP&A)?**

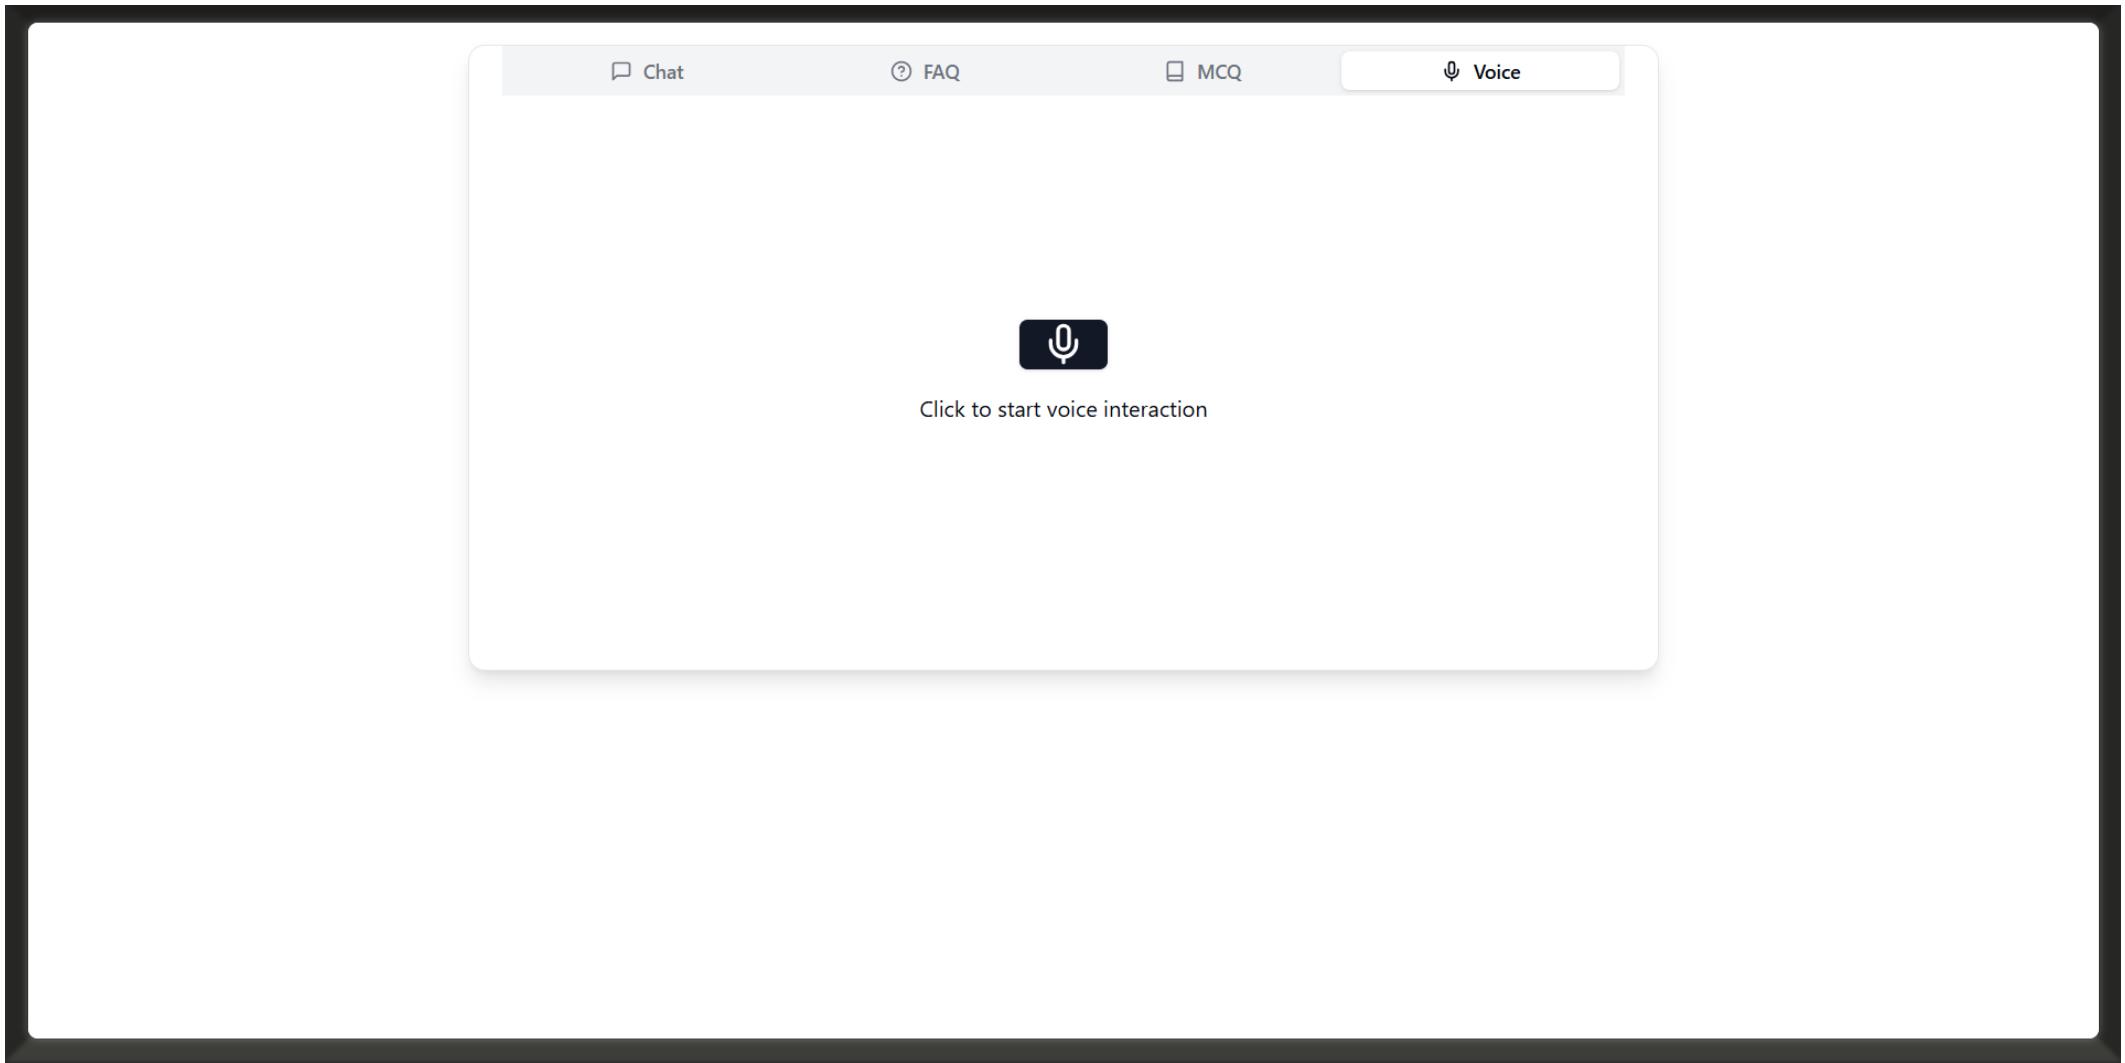

FP&A is a group of processes that support a company's financial health. It includes planning, forecasting, budgeting, and analytical activities.

**What are the key components of FP&A?**

The key components include budgeting, forecasting, financial analysis, reporting, and strategic planning.

The screenshot shows a user interface for a chatbot. At the top, there is a navigation bar with four tabs: "Chat", "FAQ", "MCQ" (which is highlighted in blue), and "Voice". Below the navigation bar, the text "Question 1" is displayed. The question asks, "Which of the following is NOT a primary function of FP&A?" Below the question, there is a list of four options, each in its own box: "Financial Planning", "Customer Service", "Budgeting", and "Forecasting". A light blue callout box labeled "Explanation:" provides the answer: "Customer Service is not a primary function of FP&A. The main functions include financial planning, budgeting, forecasting, and analysis."

make 16:9 aspect

I'll adjust the infographic to a 16:9 aspect ratio which will be perfect for LinkedIn and other social media platforms.

I've redesigned the infographic to fit a 16:9 aspect ratio (1920x1080) with these key changes:

1. Widened the layout to utilize the horizontal space better
  2. Reorganized the sections to flow horizontally rather than vertically
  3. Made the statistics more prominent with wider boxes
  4. Enlarged the CTA section for better visibility
  5. Maintained all the key information while improving readability
  6. Adjusted spacing and proportions for optimal viewing on LinkedIn

The wider format actually works better for LinkedIn as it takes up more screen real estate in the feed. Would you like any adjustments to the layout or sizing of specific elements?
